2nd OPEN CALL
open until 28 August 2023

*The programme is mainly based on on-line activities with no cost for the participants
STRADA is a leadership development programme for emerging female leaders across manufacturing to develop knowledge and skills to become more effective in their career and their organization. Equality, diversity, inclusion, collaboration and commitment are the pillars of this project.

STRADA is designed for female ESTEAM, working in the area of manufacturing or students in MSc and PhD degrees oriented to the industry who would like to develop their leadership competences and develop their abilities in key areas to become better leaders and managers.

STRADA programme is for you

- As a mentee (only for woman): if you are a female ESTEAM students in MSc and PhD degrees or a women employed in the manufacturing sector, whether in academia, RTOs or industry and you are excited to learn and make contacts in a 3-month programme, from mid-Sept to mid-Nov.

- As a mentor: if you are eager to share your experience with your mentee and extend your network. You are committed to 2.5h with your mentee and you will be invited to participate on a voluntary basis on 2 mentor round tables

- As a speaker: If you are unable to dedicate part of your time to supervising a mentee now, a 1-hour webinar can be a way to share your experience and knowledge. Are you up for it?

- As a sponsor: If you decide to support the programme economically, you will contribute to the students being able to attend the events so that you can meet each other physically. On our website you will find a package for you. If it doesn’t fit what you were thinking, don’t hesitate to contact us.

What can you expect from STRADA?

Along the 3-month programme our mentees will enjoy up to 30 hours of training including Master-classes, on-line webinars, international workshops, teambuilding sessions and networking events with a learner centric approach & competency in 4 main pillars:

- Developing leaders and Managers.
- Leading digitalisation.
- Entrepreneurship/Innovation.
- Leading Sustainability.

Furthermore, participants will count with personal experienced mentors selected to help them define their career path or strategic roadmap and discover new opportunities, share skills and experiences through 1:1 mentoring sessions.

We invite you to participate and make a difference. Be empowered and become a strong female leader to foster diversity in the manufacturing industry.
